W30SD
SUPER DUTY

Your Best Choice in Grout and Small Line Concrete Pumps

The W30SD pumps 1/2 inch (-12mm) minus aggregate up to 25 yards per hour and was engineered with the contractor in mind. All it's components are of made of the highest quality materials and engineering designed to last while providing you consistent results.

It is equipped with powerful dependable engines (Diesel or Gasoline) and a heavy duty centrifugal clutch. It also uses the hinged manifold locking system, a centralized lubrication system and piston lubricating box which allows smoother pumping, easier clean-up, faster set-up and higher dependability.
